Hi Michael Crowe,

Fabien mentioned that you might have gone through an exercise of finding different "Constraining Orders" Business Scenarios.

I do not seem to be able to find these on JDEX or in my emails.

Is there any change I can have the list that you compiled as we are looking at consolidating some of that information on our side and trying to make support easier moving forward.

Thank you in advance.

Ryan,

I do not recall such a document, but the following are some off the top of my head;

1. The typical standard ones
 - a. Constrain to a truck load (weight and Cubic feet / meters)
 - b. Constrain to a quantity, Cost value or volume
2. Order quantity by vendor across multiple locations (this was custom for Turn 5)
3. Distribution
 - a. Constrain to current stock on hand with order schedule into the future (basically so all the store that order today don't get all the stock)

You may want to reach out to Brett Bever about this as well as I think he was collecting these.

Thanks,

Mike
